

Trees one cycle

By: Brisa and Maya

One happy thriving tree

Make it three

They thought they'd never lose
their leaves

Wait we are gonna
lose our leaves

As the year passes by
they begin to fear

They get really sad

Once they begin
to loose their
leaves

They begin to fear that they will never have leaves again.

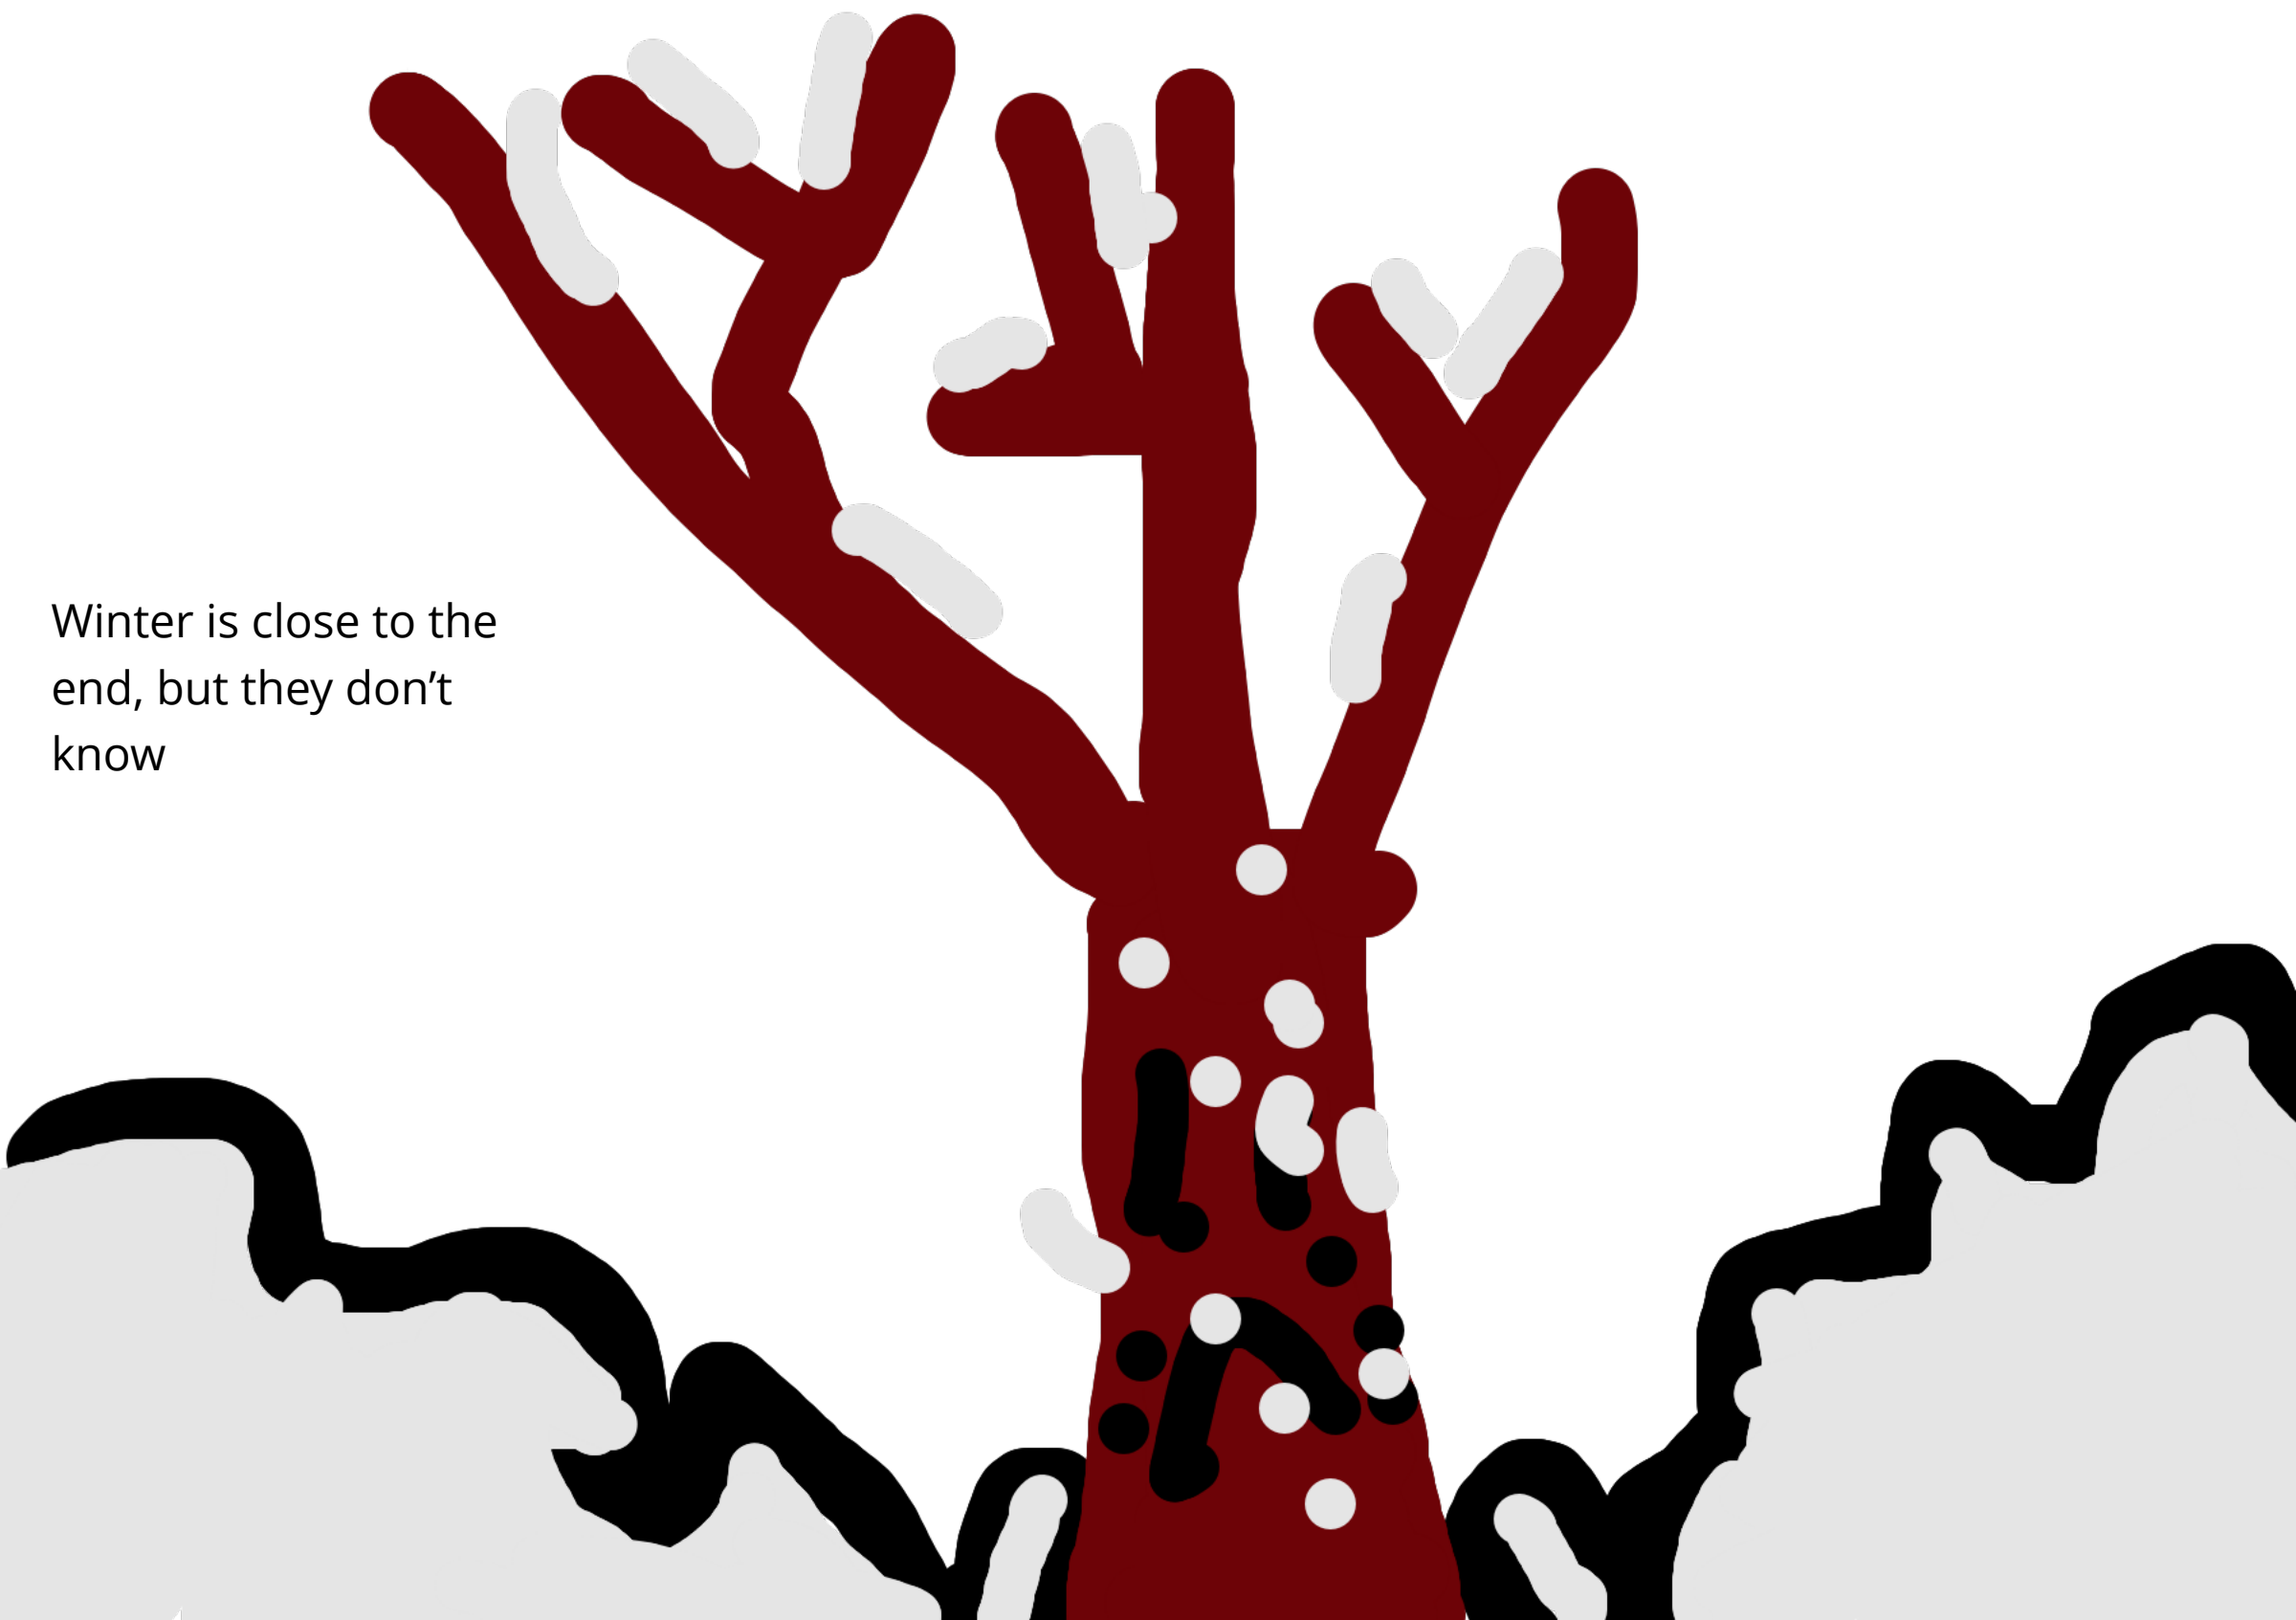

Winter is near and they
are sad.

Winter has come, they
don't feel welcome.

Winter is close to the
end, but they don't
know

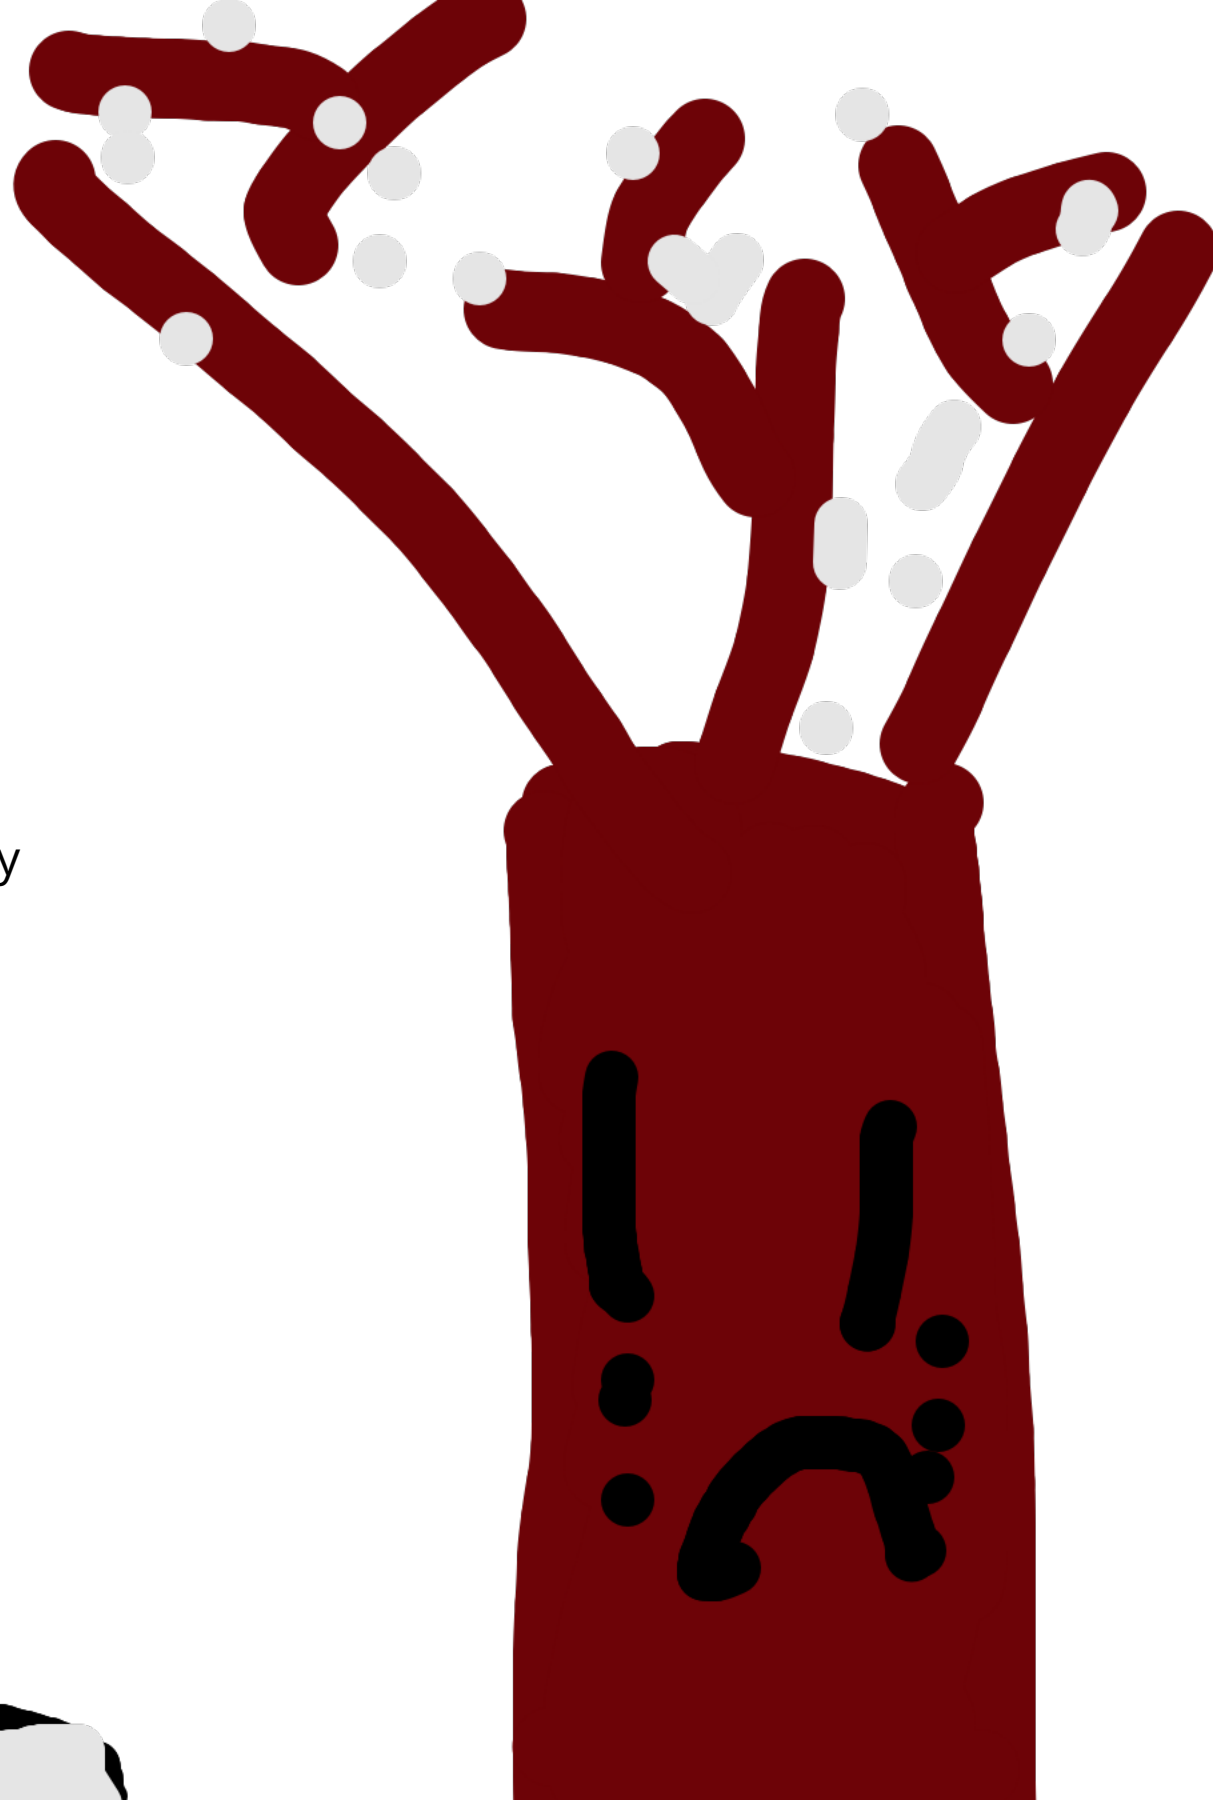

Then they think it will
definitely end
sometime.

But it seems to never
end!

After what felt like
forever spring finally
comes

Finally they felt free!

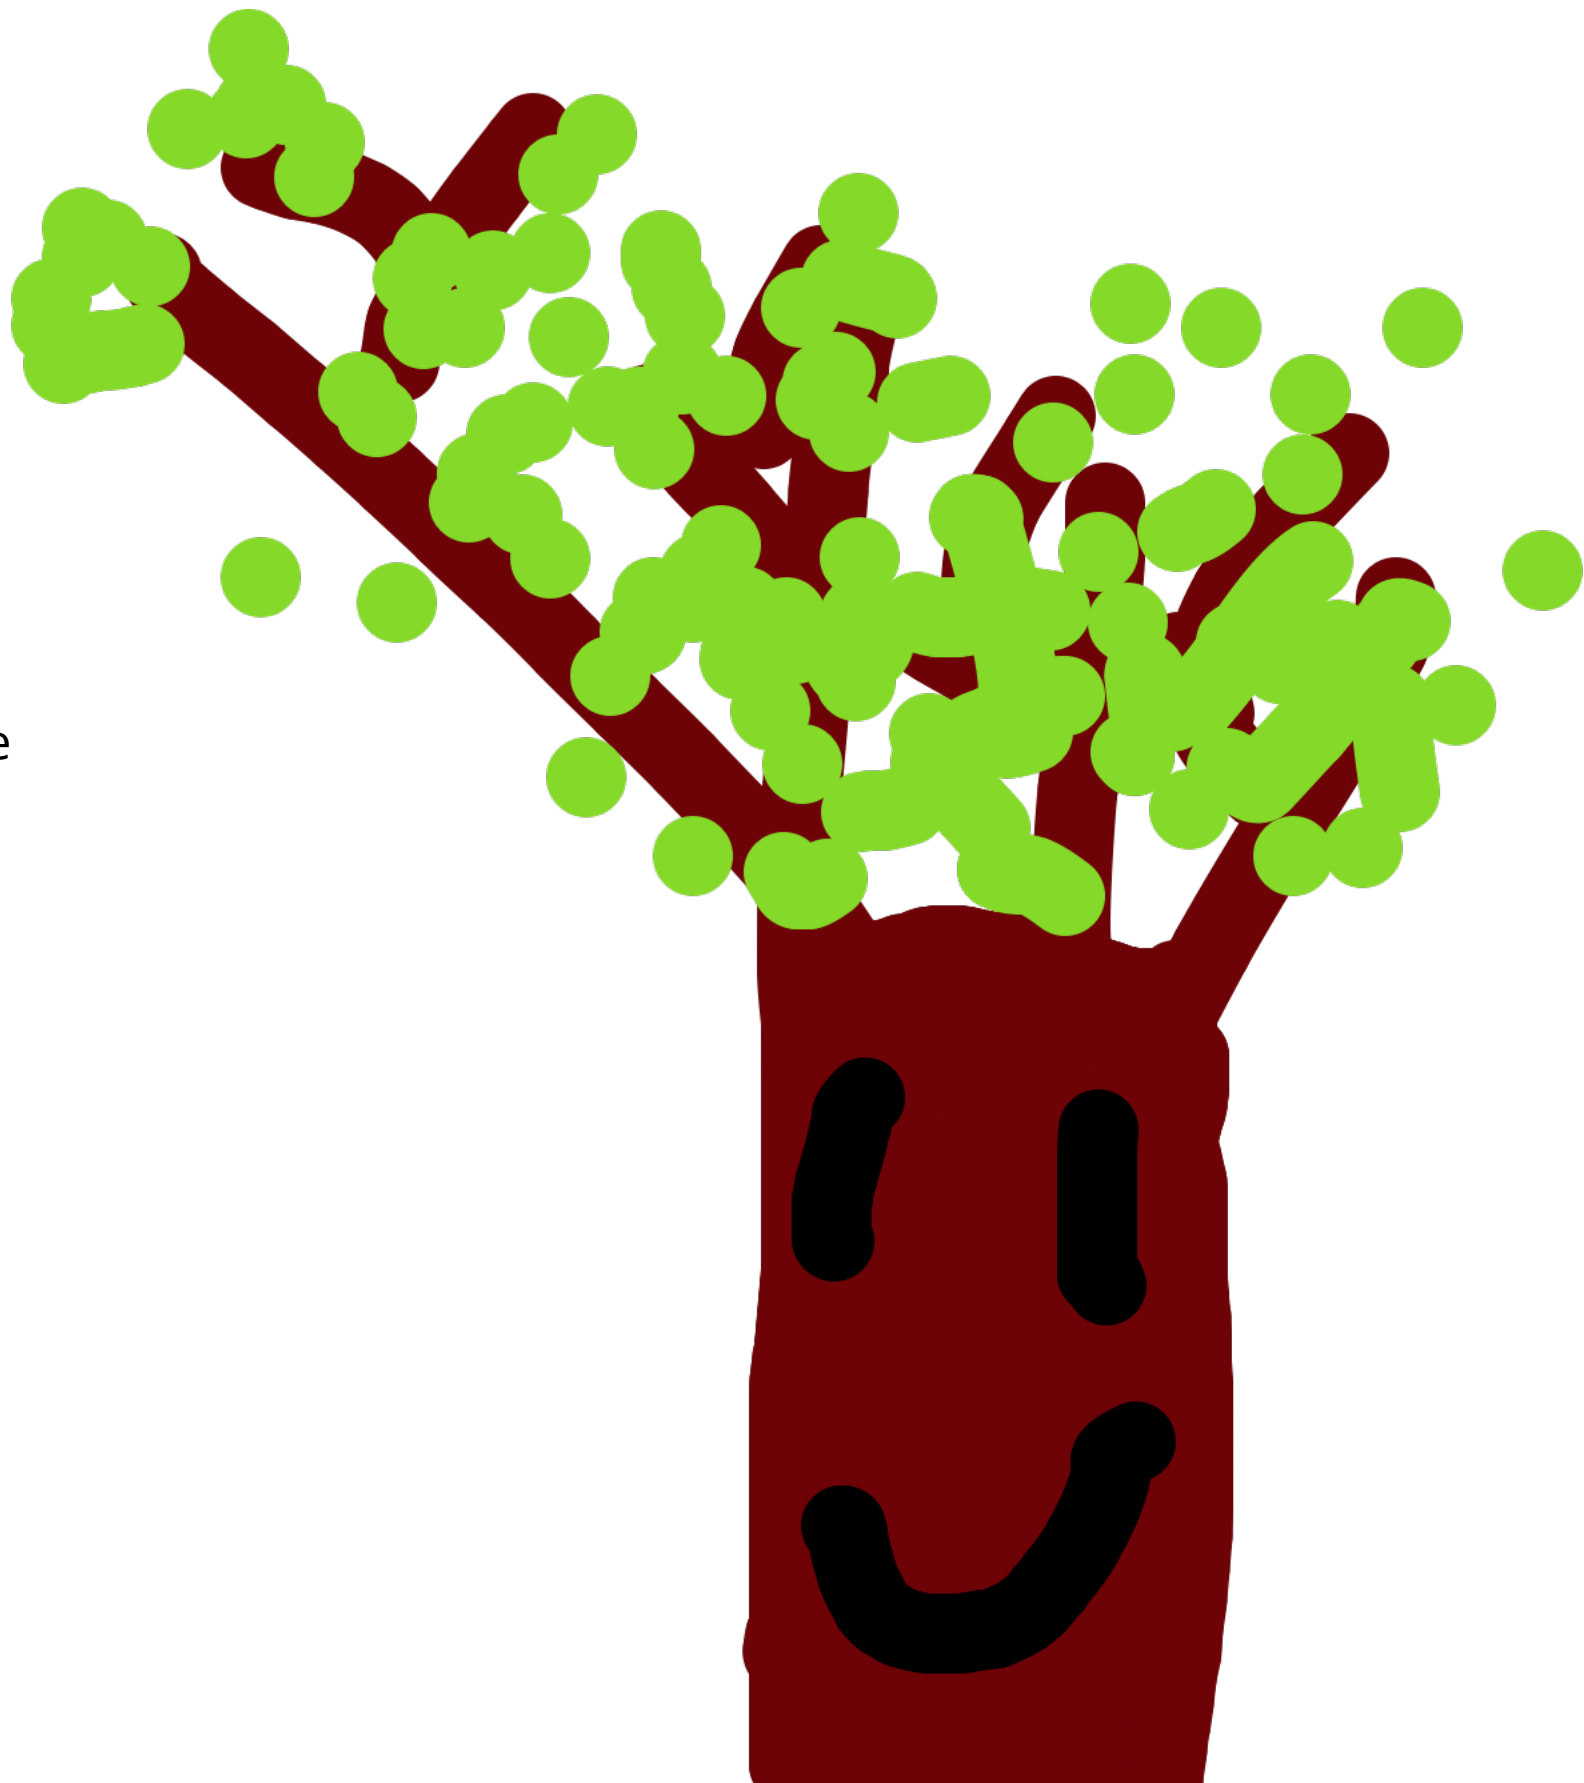

But then one leaf grows
on one tree

More of leaves grow

and more

And more!

They learned different stages of life that trees take

They also learned the importance of patience

The End
