1. Treble Clef Note Names

to the tune of "Yankee Doodle Dandy"

Name	_		
Class			
	This animal has a furry white co short ears and fuzzy paws. Its f is white in winter but changes to brown or gray in summer. This co change helps when hunting as blending with the environment	fur o	
endors	makes it harder to be seen by pr		R
_ R _ TI _	_ o x	This is the largest carnivore on the planet! The only parts of its body not covered by	
	Dark grey as a baby, this ocean dweller's skin turns very white as it grows, and a 5 inch thick	thick, white fur are the pads of its paws and the tip of its nose.	
	layer of blubber keeps it warm in icy water. Unlike other whales, it doesn't have a dorsal fin. It also has flippers that act like paddles, and a notched tail.		
LU			
Also called the Snowy Owl, this bird has very good hearing and eyesight which makes it an excellent hunter. As young owls get older, their feathers get whiter, though females are darker than	R T W H I T_	RT I W H I T W O L This beautiful creature is usually white with brown eyes. White fur camouflages it for hunting in snowy environments	1
males Its native land is the		and darker irises are better	

arctic tundra, but they do travel to Canada, northern United States, Europe and Asia.

for bright glare. It lives near the arctic circle and spends 5 months out of every year in darkness.
